

## REMARKS

In accordance with the foregoing, claims 1, 2, and 6 have been amended and new claim 11 has been added. Claims 1-11 are pending and under consideration. No new matter is being presented, and approval and entry are respectfully requested.

Claims 2-10 are objected to. The present claim amendments place these claims in condition for allowance.

Claim 1, as amended herein, recites "a first storing unit to store function selecting information comprising instructions for a user." In contrast, Roh et al. teaches selection of a geographical area, a compartment and an environment. Roh et al., FIGS 3A-3C. However, no instructions are provided to a user.

Bhatnagar does not overcome this deficiency in Roh et al. Instead, this reference is generally relied upon as teaching a voice output signal from an electronic controller. However, this reference does not teach the claimed detail function selecting information derived from the selecting information (including the instructions for a user).

New claim 11 is similarly patentable over the cited references.

Accordingly, withdrawal of the rejection is requested.

In accordance with the foregoing, it is respectfully submitted that all outstanding objections and rejections have been overcome and/or rendered moot. And further, that all pending claims patentably distinguish over the prior art. Thus, there being no further outstanding objections or rejections, the application is submitted as being in condition for allowance which action is earnestly solicited.

If the Examiner has any remaining issues to be addressed, it is believed that prosecution can be expedited by the Examiner contacting the undersigned attorney for a telephone interview to discuss resolution of such issues.

If there are any underpayments or overpayments of fees associated with the filing of this Amendment, please charge and/or credit the same to our Deposit Account No. 19-3935.

Respectfully submitted,

STAAS & HALSEY LLP
